

What's New MIKAL 6.3 and More!

There are many new things going on at MIKAL and with the SIX version system. All enhancements are designed to reduce paperwork, improve efficiency, and increase client and staff satisfaction.

The MIKAL Dashboard: Computers are supposed to give you immediate information that will aid you in decision-making. The all new Dashboard has real time information ready on your task bar at any time. Just click on the program and you will see client flow, sales figures, productivity, and future booking information – powerful real time information. You can also see this information by employee or final totals for past dates. *This information is current – to the minute!*

Cancelled #	0	\$	0
Cancel(tod)#	0	\$	0

Loyalty and Points Program Upgrade: If you are using the Points Program you know how powerful a client loyalty program it is. Now points are taken to a new level with the ability to assign double points for sales on days of the week, extra points for specific service or retail items, and the ability to see points on the Daily Activity Report.

ALL NEW Expanded Appointment Book display: See 5 employees across the screen with more detail on each appointment including: Expanded name field and much more detailed services!

Display the current Date and Time on the appointment book screen: This feature shows the date and time on the main appointment display screen. A great feature if your display is set up to hide the task bar.

Display customer transaction history on Smart Book:

This is a great feature if during the customer booking questions arise as to the last time a service was done or with multiple services what service provider did the services.

Quick Change Appointment Customer: 6.3 has a new feature that will allow you to change the customer only in a booked appointment. This feature will only work on a non-standing appointment

Change credit to the correct service provider after a sale and add items to a sale without editing the entire Point of Sale Screen! Services can be added by staff without access to the entire Point of Sale screen and employees can be changed for credit if different employees perform the service than were booked for the services. WOW!

Plus: Reason codes per line item, Recurring billings, Retail sales tracked as a percent of services, Quick method for adding/moving employees in resource groups – and more!

Order the upgrade to 6.3 today. Only \$79 if you are on vsn 6.2 513-528-5100
